# Foreword

Welcome to the MICCAI 2013 workshops, challenges and tutorials!

The 16<sup>th</sup> International Conference on Medical Image Computing and Computer Assisted Intervention, MICCAI 2013, will be held from September 22<sup>nd</sup> to 26<sup>th</sup>, 2013 in Nagoya, Japan. In addition to the three-day MICCAI main conference, the annual MICCAI event hosting satellite workshops, tutorials and challenges will be scheduled on September 22<sup>nd</sup> and 26<sup>th</sup>.

This year's call for workshop, tutorial and challenge proposals recorded 30 workshop/challenge proposals within 4 half-day proposals and 7 tutorial proposals within 4 half-day proposals. These proposals were independently reviewed by the chair team who eliminate conflict of interest. The chair team utilized several criteria to select the submitted workshops, tutorials and challenges. Workshop proposals were reviewed under whether or not workshops emphasize open problems addressed in the MICCAI community. The purpose of workshops is to provide a comprehensive forum on topics that might be partially explored during the main conference. On the other hand, tutorial proposals were considered if and only if the proposed tutorials could provide educational material for training new professionals including students, clinicians and researchers. The chair team also emphasizes tutorials on dealing with an existing sub- discipline of MICCAI with known material, approaches and open problems. Moreover, challenge proposals were determined by their interaction and encouragement in problem solving. Although all submitted proposals were very attractive, the chair team primarily selected 21 workshops, 6 tutorials and 5 challenges within one challenge being hosted at a workshop. After consulting with the workshop, tutorials and challenge organizers, the chair team eventually included 21 workshops, 5 tutorials and 6 challenges in this program. Basically, workshops and challenges follow a single stream of oral presentation within significant time for questions and discussion. They also involve panel and poster sessions. Tutorials will be presented by lectures that are involved with sufficient discussion.

We thank all workshop, tutorial and challenge organizers for their hard work and effort in making such a comprehensive and unique program available. We hope that you will enjoy this program of MICCAI 2013 Workshops, Challenges and Tutorials. We look forward to your continuing support, contributions and participation in future MICCAI conferences.

### Delegate Badge

A name badge will be provided with your registration documents on site. Please wear your delegate badge at all times. All entrances to conference, workshops, exhibition halls and social events are manned by ushers. Only MICCAI2013 participants wearing an appropriate official delegate badge will be allowed to access the conference site and to attend the scientific and social programs.

### Internet Access

Participants have two options to assess wireless internet available in Nagoya University as follows:

- **NUWNET:** You could assess the university-wide internet access service “nuwnet” by an issued guest account, which will be valid until September 26, 2013. You will also receive the Nagoya University Internet Security Guideline in your registration kit. Please read this guideline carefully before your internet access. The service set identification (SSID) is either “nuwnet” or “nuwnet1x”. Please use either SSID “nuwnet (5GHz)” or “nuwnet1x (5GHz)” if you are in the IB place.
- **EDUROAM:** Nagoya University is a member of the Eduroam Network. You could connect your WiFi-enabled devices to the Eduroam Internet by your own eduroam account that you may obtain from your university. Please also keep in mind that some areas in Nagoya University provide the eduroam service using 5GHz band (IEEE 802. 11a) in addition to 2.4GHz band service (IEEE 802.11g).

### Poster Presentation

Workshop posters in IB building will be set up close to their assigned workshop rooms. The posters settled up in ES building will be placed in a passageway on the 2nd floor. The posters scheduled in Noyori Conference Hall will be located in passageways of the ground floor. Posters should be mounted on the workshop day from 8:30 and removed before 18:00. Please notice that all unremoved posters will be discarded after the workshop day. Please also make sure your poster size adhered to Standard A0 (841 mm in width, 1189 mm in height) that you should strictly follow in preparing your

posters. The conference will provide materials for mounting your posters.

### **Lunch and Coffee Breaks**

Lunch and Coffee are included in registration and are distributed at each building.

### **Oral Presentation**

Please follow the guideline for each workshop, tutorial and challenge.
